

**LIBERTY  
PULTRUSIONS**

Manufacturer of Engineered FRP Pultrusions

“ Manufacturer of  
**Quality Engineered Pultrusions**  
For Over **40** Years ”

## Custom Pultrusions

Liberty Pultrusions can manufacture a variety of custom and standard pultrusions. We have the ability to custom design very large or small pultruded parts.

### Capabilities:

Liberty Pultrusions can produce large or small, complex or simple, thin or thick custom geometric Pultrusion shapes. We have been manufacturing custom pultrusions since our founding by Westinghouse Electric Corporation in 1964.

### Profile Design:

Liberty Pultrusion's engineering staff can assist in the design of virtually any continuous cross sectional pultrusion profile. We can take your idea from concept-to-final product reality.

### Resin Systems:

We can design the resin system to meet a variety of customer requirements. Some specific customer requirements may include, elevated temperatures, corrosive environments, UL rated non-conductive systems, high flexural modulus, stiffness and, of course, low cost. Our current resin systems include polyester, vinyl ester and polyurethane or urethane products.

### Fiberglass Reinforcements:

Our engineers have a wide range of fiberglass reinforcements available to solve demanding customer requirements. We offer single-end and premium multi-end rovings, continuous filament mats, stitched mats, woven fabric and other specialty glass reinforcements.
